

Lavantgarde : „Take me s.i.m.“

" TAKE ME S.I.M. " is a danceable excerpt taken from LAVANTGARDE´ s album "INSIDE OUT " available on 27.09.2004.

The electro track convinces with its straight beats, lovely melodies and expressive singing. LAVANTGARDE open up borders with their music and bring different tastes together without leaving their tracks. On the one hand the radio edit is a typical uptempo song absolute suitable for the dancefloor but because of its harmonies also just nice for leaning back and listening to.

Mic- L , producer of the " INSIDE OUT " album is responsible for the Coldwrapped Mix which has a great sound and a glam rock type of beat to it. The swiss band Kartagon also under SPR have made a complete different approach to the song which is far more " near the edge " and club orientated.

Even though electronica is their main interest there is an accoustic version of "Dedicated" on the MCD showing the bands open mindedness towards different types of music styles.
